PLUMAGE TERMINOLOGY

MUKANDRA HILLS TIGER RESERVE

The Mukandra Hills Tiger Reserve (MHTR) is located in the southeastern part of Rajasthan. It is the third tiger reserve in the state. The reserve spans across the districts of Kota, Bundi, Jhalawar, and Chittorgarh. In 1955, it was declared a protected area. Later, along with Jawahar Sagar Wildlife Sanctuary (1975) and the National Chambal Sanctuary (1983), forming a larger conservation area. The Mukandra Hills were officially declared as Rajasthan's third tiger reserve in 2013.

The reserve covers a total area of 1135.78 sq. km, including a core zone of 690.71 sq. km and a buffer zone of 445.07 sq. km. The MHTR have a unique habitat, characterised by II type dry deciduous forest interspersed with grasslands, scrublands, wetlands and riverine habitat with rocky terrain. The different types of habitats support a rich floral diversity with

Kala Dhok (*Anogeissus pendula*), **Khair** (*Senegalia catechu*), **Ber** (*Ziziphus* spp.) and faunal species like **Tiger** (*Panthera tigris*), **Common Leopard** (*Panthera Pardus*), **Sloth Bear** (*Melursus ursinus*) and **Indian vulture** (*Gyps indicus*), **Crested Treeswift** (*Hemiprocne cornata*), **Greater White-fronted Goose** (*Anser albifrons*) with **Indian Rock Python** (*Python molurus*), **Mugger** (*Crocodylus palustris*), **Spectacled Cobra** (*Naja naja*). This area holds Rajasthan's largest Indian Vulture (*Gyps indicus*) breeding colony in the gorge of the Chambal River.

ACKNOWLEDGEMENT

The project team would like to sincerely thank the Principal Chief Conservator of Forests (Pavan Kumar Upadhyay, IFS) and Chief Wildlife Warden (Shikha Mehra, IFS), Rajasthan Forest Department, for granting permission to conduct this work.

We express our special gratitude to the Chief Conservator of Forests (Mr. Sugna Ram Jat, IFS) and the Deputy Chief Conservator of Forests (Mr. Muthu Somasundaram, IFS), Mr. Anurag Bhatnagar (DFO) and Mr. Rajpal Sharma, Parmanand Gochar, Mr. Jasveer Singh Bhati, Ms. Sarita Meena and the forest staff of Mukandara Hills Tiger Reserve for their continuous assistance during the work.

We are also deeply thankful to the Director, Dean, and Registrar of the Wildlife Institute of India, Dehradun, for their unwavering support.

We are also thankful to Dr. Beependra Singh, Bitupan Boruah, Dr. Lakshminarayan N. and Vijay Joshi, Abhay Thapa for their support during work.

We sincerely thank and acknowledge Mr. Harshit Sharma and Dr. Anshu Sharma for providing bird photographs, Noyan Uppadhai, Shalu Badgujer, Rohit Charan and Aanshi Suman for their valuable support during work and also thankful to Arjun Singh Badgujar, Koustubh Dharwal for their assistance.

INTRODUCTION

Birds are warm-blooded animals, characterised by insulated feathers, wings and a toothless beak.

Birds play vital ecological roles as pollinators, seed dispersers, and scavengers, helping to maintain the balance of ecosystems.

India hosts 1,112 bird species (Bird International), and Rajasthan alone shelters nearly 510 species, of which approximately 350 species (eBird) have been recorded from Kota.

You will find details and photographs of 219 bird species, many of which you are likely to encounter during your visit to the reserve.

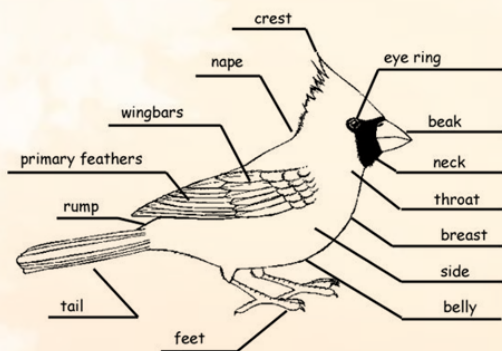

How to identify birds

Learning to identify birds is a fun skill. When you see a bird, look for these things:

- **Size and Shape:** Is it small like a sparrow or big like a crow? Does it have a long neck or a round body? The overall shape is a big clue.
- **Colours:** Look at the colours of its feathers. Does it have a bright red patch, a white stripe on its wing, or a yellow belly?
- **Where You See It:** Where did you find the bird? Was it near a river, on a tree, or on the ground? Knowing where a bird lives can help you figure out what it is.
- **Activity:** Is the bird hopping on the ground, on a branch/wire, is foraging or singing or soaring high above in the sky? You notice numerous activities once you start observing birds.
- **Sounds:** Listen to its calls and songs. Every bird has a unique sound.
